

BTECH BIOMEDICAL ENGINEERING

The Biomedical Engineering program is introduced in collaboration with University of Toledo, USA from the academic year 2019-20. This unique program is designed to give students international experience, prepare them for professional careers, and expose them to state of the art facilities and cutting-edge research in the fields of biomedical engineering. The program accentuation on engineering and entrepreneurship designed for students planning to move straightforwardly into the industry / research organization after completing the program. The primary focus of the program is on the development of medical devices and its functional application in the creation of new and novel healthcare devices.
